

SSAB Zero™ Certificate of Carbon Emissions

- Audited to a third-party verified method
- Without mass balancing allocation of emission reduction
- Without carbon offsets

Fossil carbon emissions from SSAB's operations:

<0.05

kg CO₂e/kg steel in Scope 1 + 2

Independent verification

DNV Business Assurance Finland Oy Ab has verified, in accordance with SSAB Zero® Methodology (Versions Zero Steel Plan SSAB Europe and Special Steels v0.18 and Zero Steel Plan SSAB Americas v0.10, published May 2023 and June 2023, respectively), the CO₂e emissions of the SSAB Zero® steel product family for scopes 1 and 2 and transportation between SSAB Zero® production sites. Note that emissions from the painting process, including all layers, of the color coated products are not included in the verification. The "SSAB Zero® CO₂e Emissions Verification Statement" is available on ssab.com.
